

Bennetts British Superbike Championship Round 3 Snetterton

The weekend started out well for us managing to have a solid test day on the Friday getting a good feeling with the bike at a circuit we know we can go well round, getting comfy on the bike in free practice 1 and free practice 2, setting a new PB lap time of a 1.54.4, putting us in a good place for qualifying on Saturday morning

However, we ended up having quite a fast crash in qualifying due to a mechanical issue with the front brake on the out lap of the session, which meant no lap time set unfortunately, putting us at the back of the grid for race 1 in the afternoon. After a big effort from the team, we managed to get the bike rebuilt for the race leaving pitlane with 6 seconds to spare before pitlane closed for race start. The race was really good for us managing to match our lap time from FP2 and finish a solid P3 in the cup class

Making a few changes for race 2 on Sunday, we were feeling confident and the race was our best back at British championship to date, we managed to fight at the front of our cup class, setting a new PB lap time of a 1.53.4 and finishing P2 in the cup class, the changes we made were really positive and they have put us in a good place for our next weekend at Brands Hatch Circuit on the 18-19 July.

Thank you again for the Support, with your help you are making us able to keep pushing hard at the front of the championship and getting really good results

James Alderson
